

A Healthier Montana Task Force
January 15, 2015
10:00-11:00am

Welcome and Roll Call

Overview

The results of the prioritization survey were discussed. The desired outcome of the meeting was to discuss the top four issues the task force would focus on during the next year.

Prioritization results:

Physical Activity/Obesity
Childhood Immunizations
Cigarette consumption
Mental Health

The State Health Improvement Plan was used as a guide to establishing the prioritization areas. The prioritization areas chosen have historical framework which will be used in order to establish a baseline. One hundred percent of the Task Members completed the survey which was used to establish these areas.

Task Force Discussion - Next Steps

We are looking at the steps that can be taken in the next year. Public Health and Safety Division staff will put together work plans on the four areas with health indicators from the four prioritization areas. A blank plan will be sent to Task Force Members in order to establish what their communities have in terms of the prioritization areas.
